

5G Verification and Validation for global Industry-specific Network Services and Apps

PM: Josep Martrat, TM: José Bonnet

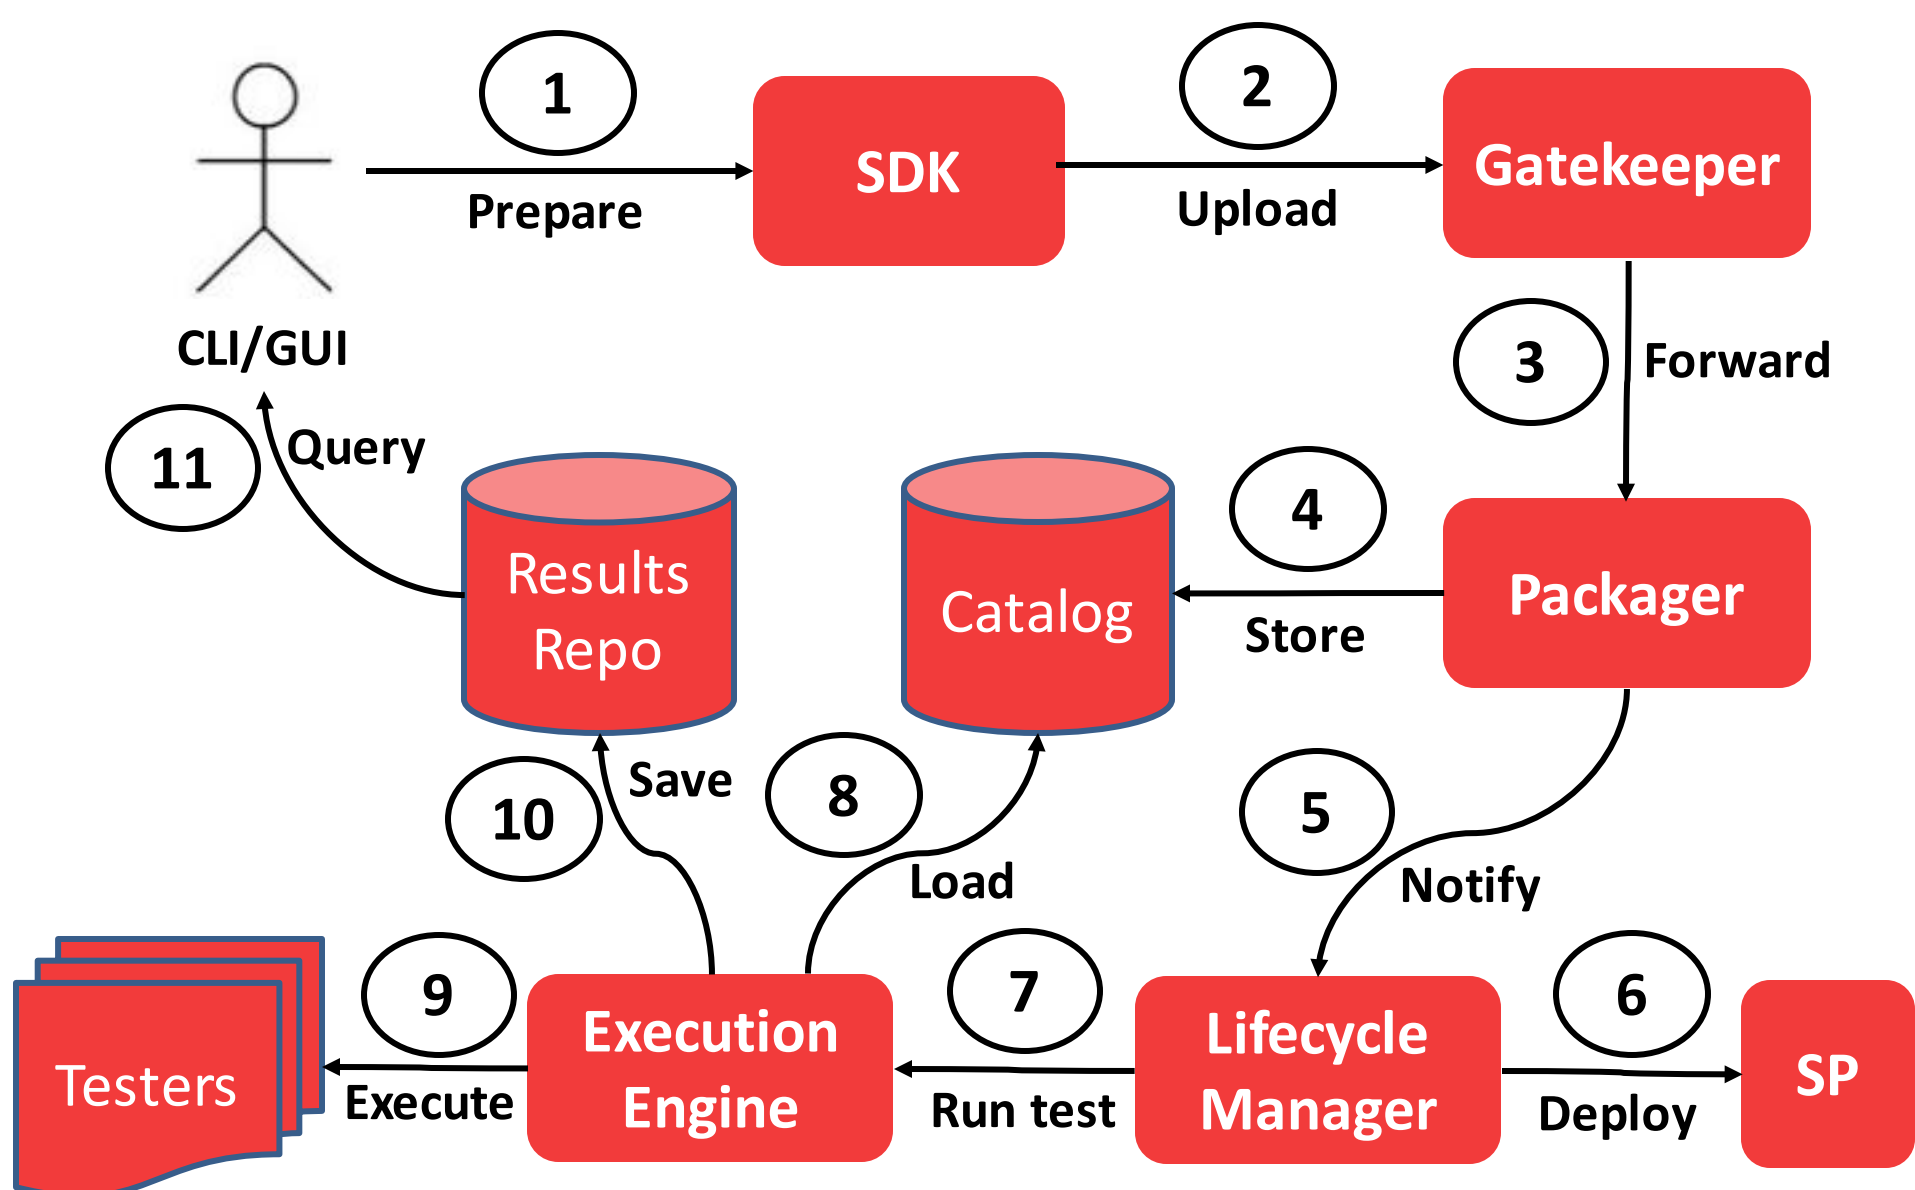

Key Objectives

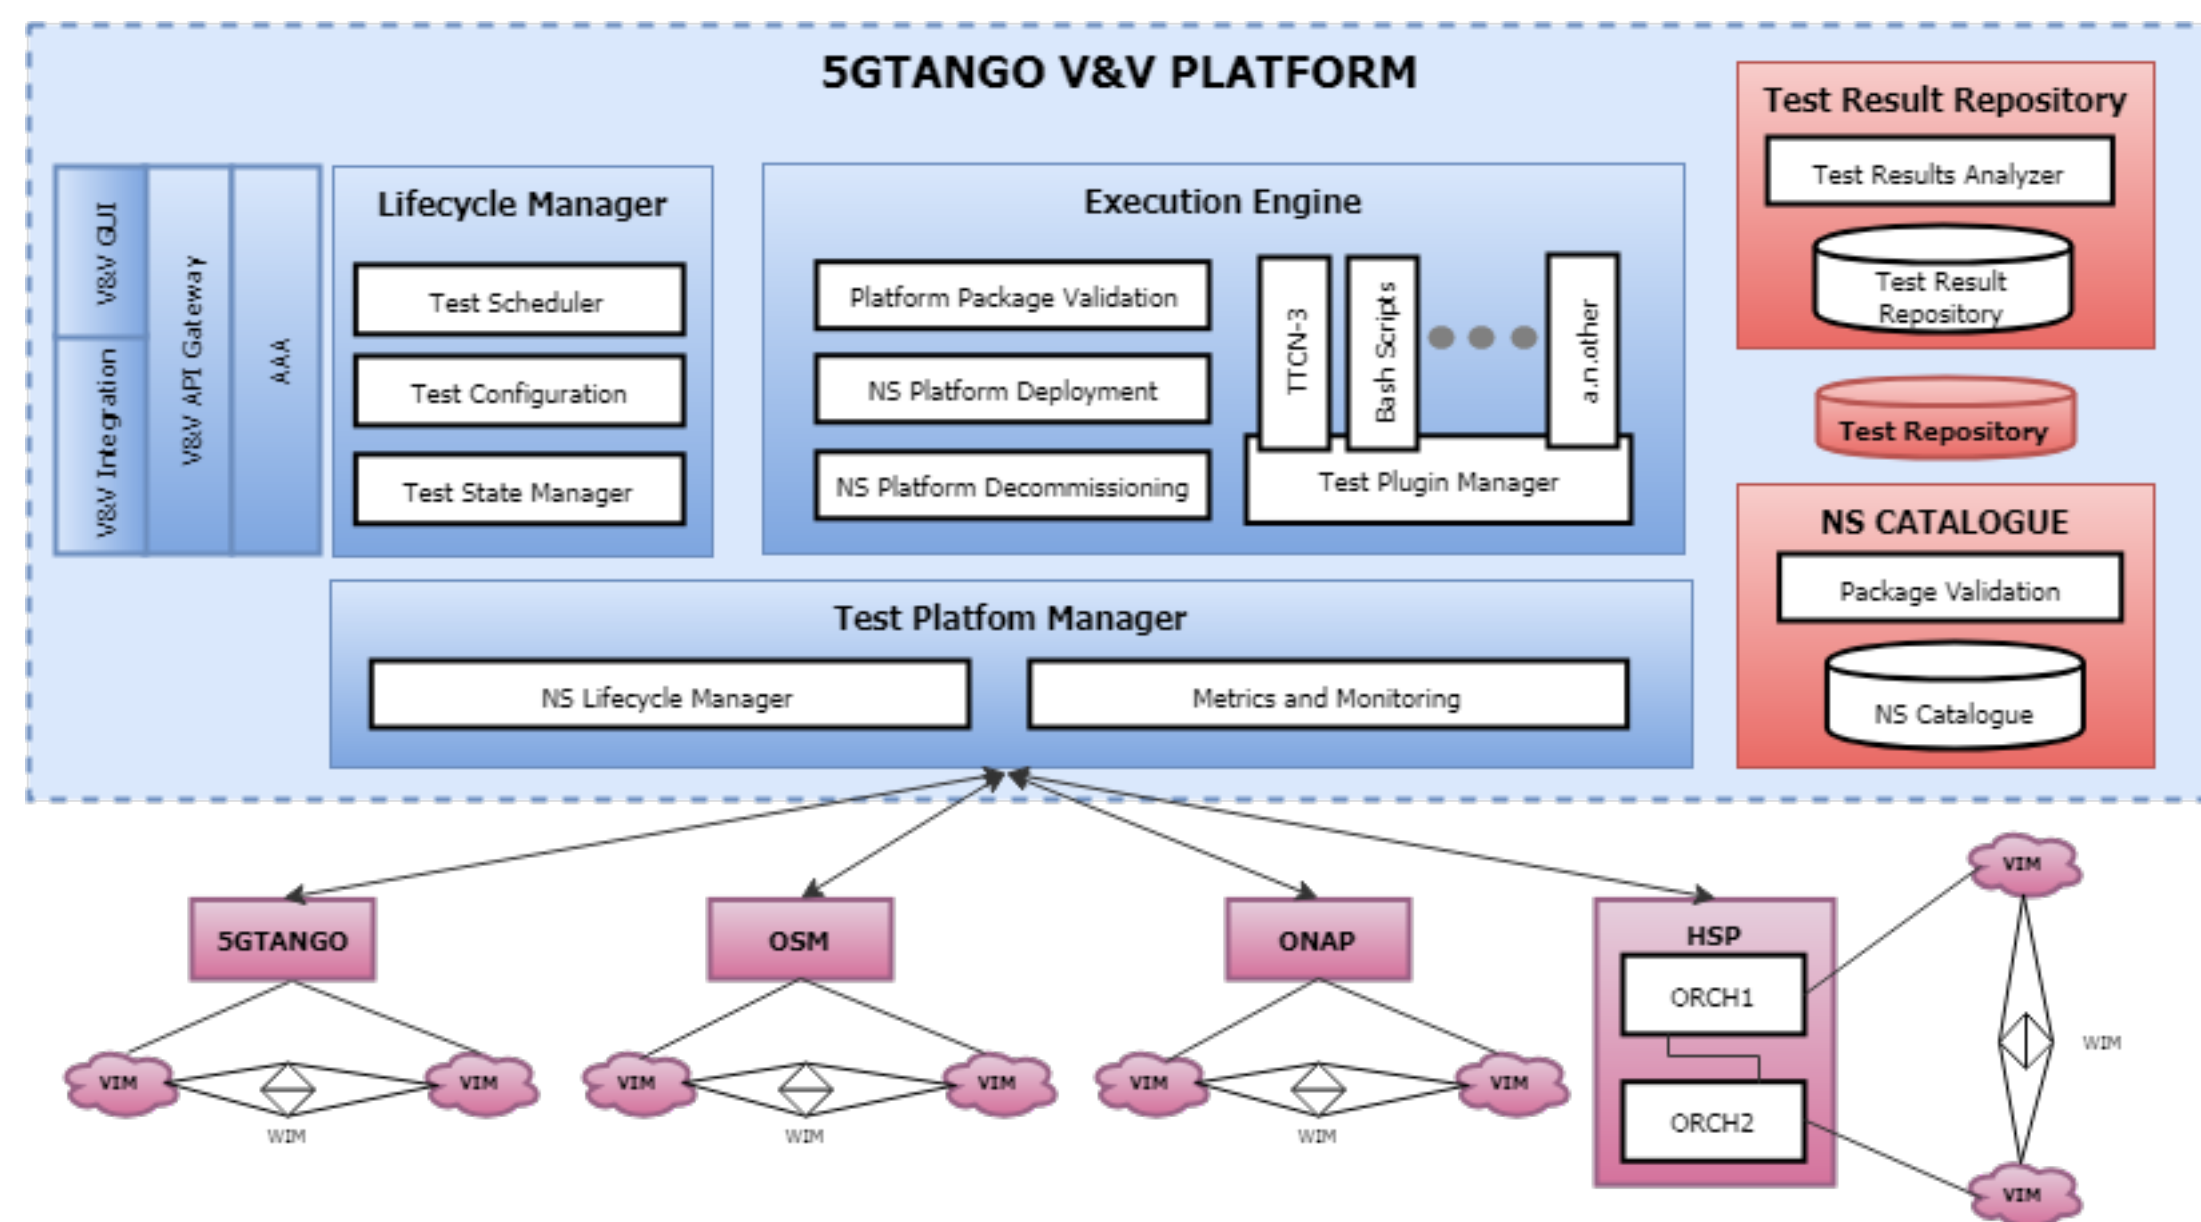

Key Features

- 1 Certification of single VNF/Network Services
- 2 Customizable tests via test plugin architecture
- 3 Multiplatform Test Support (OSM/ONAP etc)
- 4 Multiple deployments (V&V Ecosystem)
- 5 Catalogue of VNFs & tests available for reuse
- 6 Search published test results to help choose Services

Basic Workflow

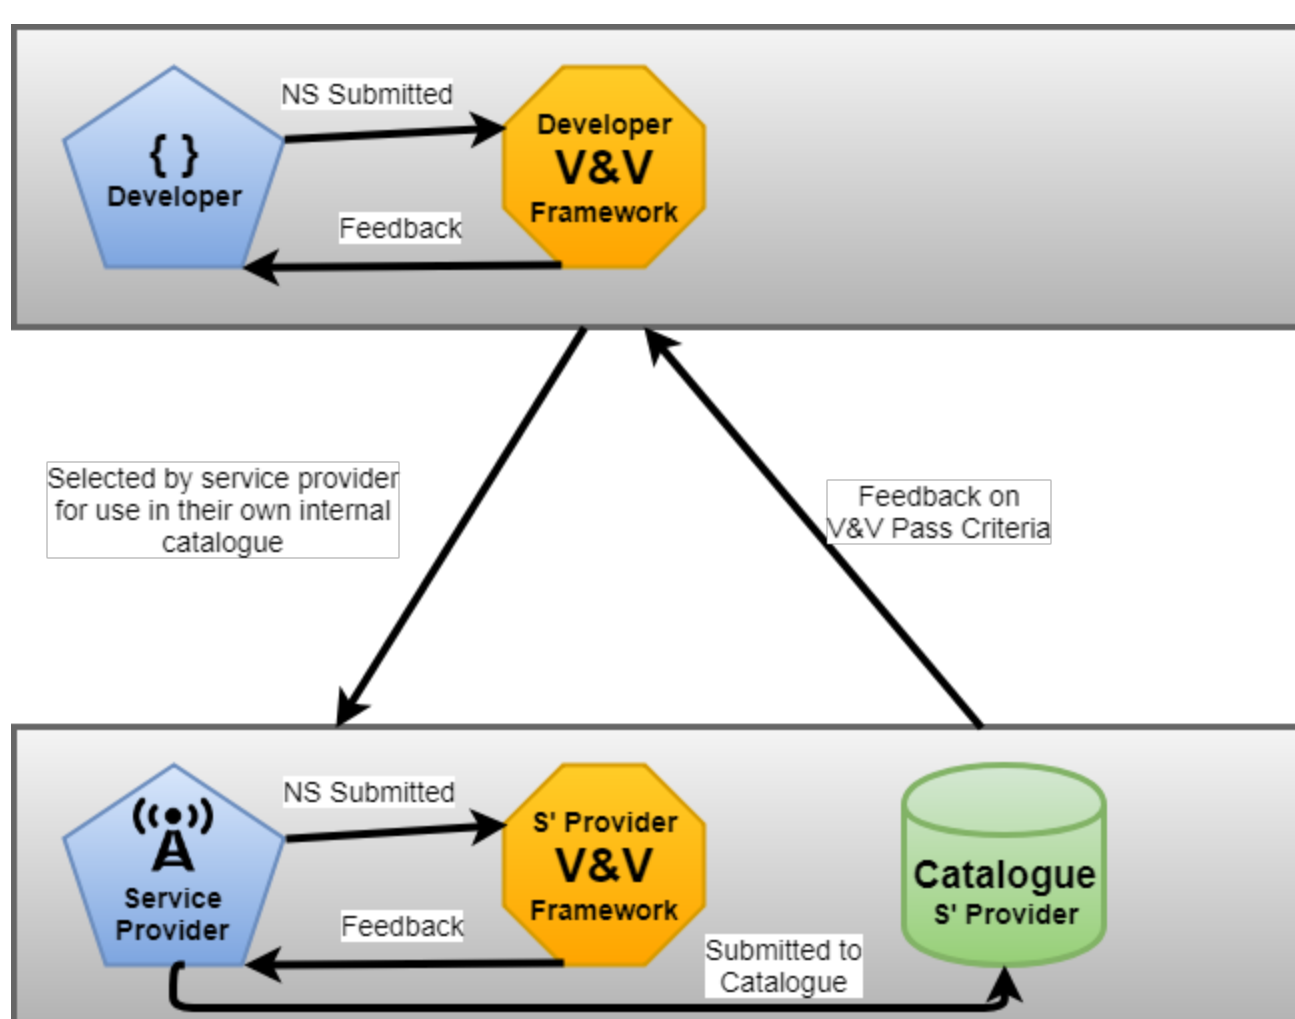

High Level Architecture

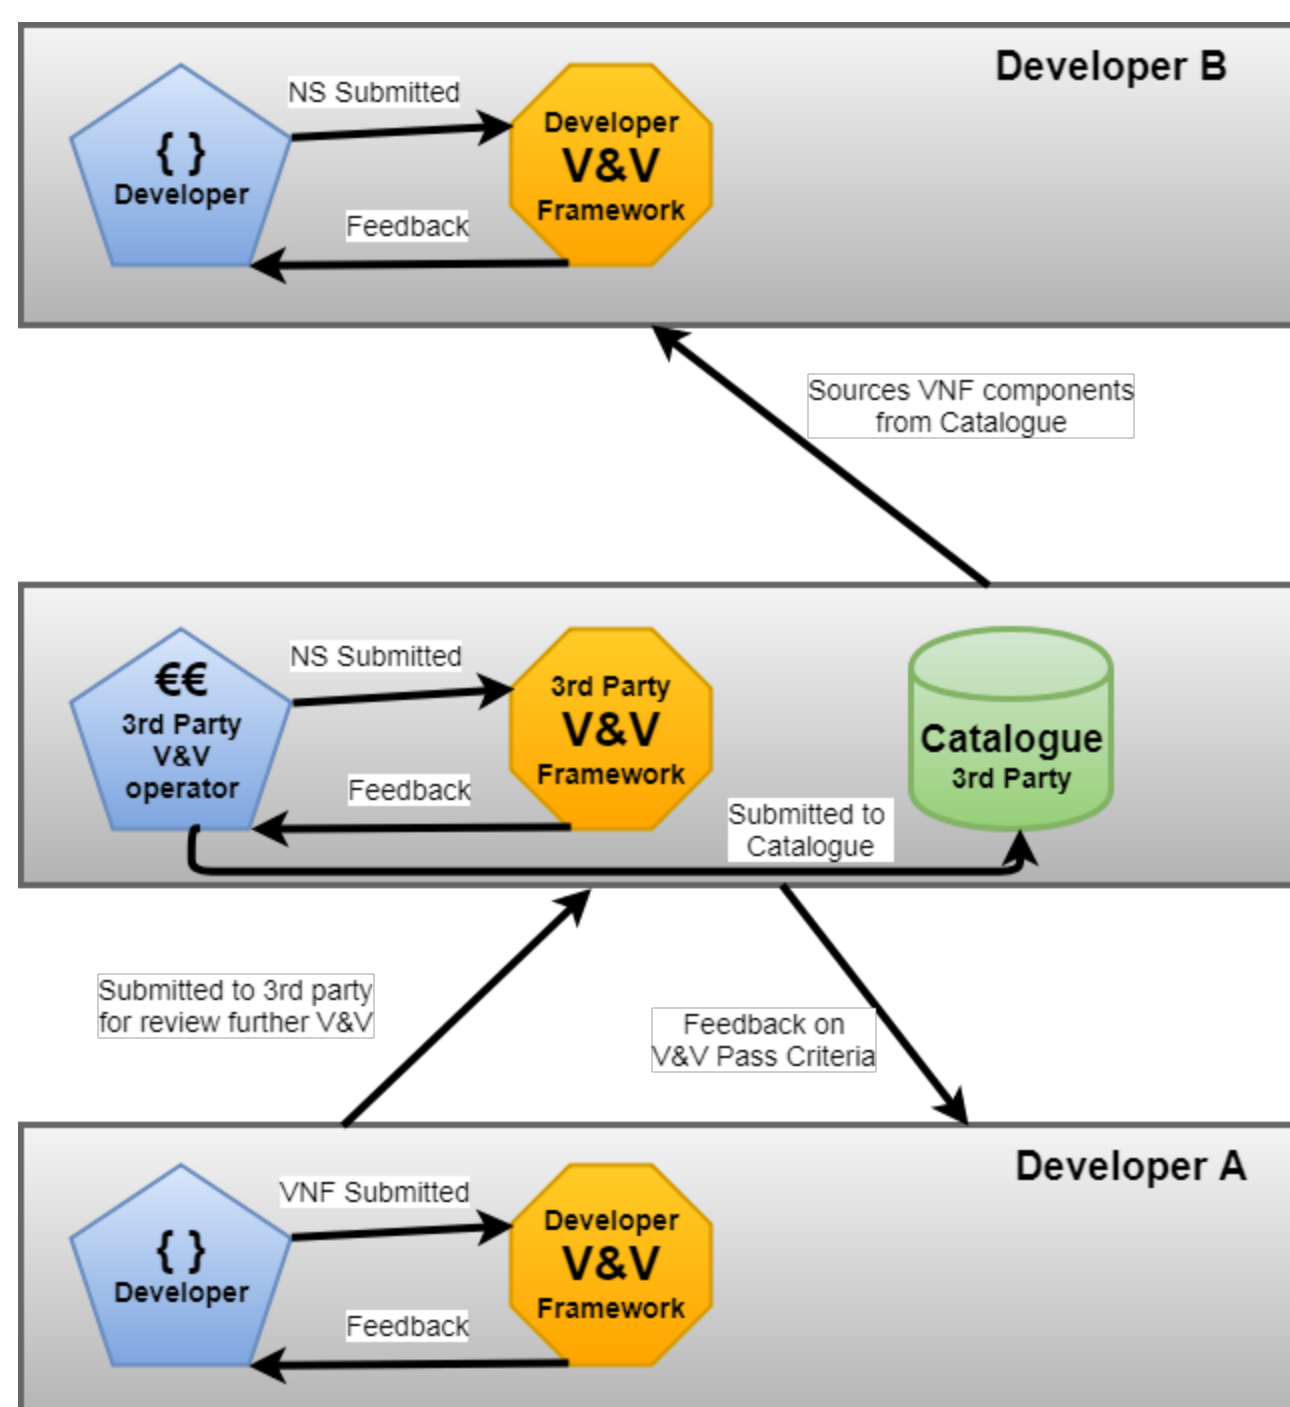

High Level Deployments

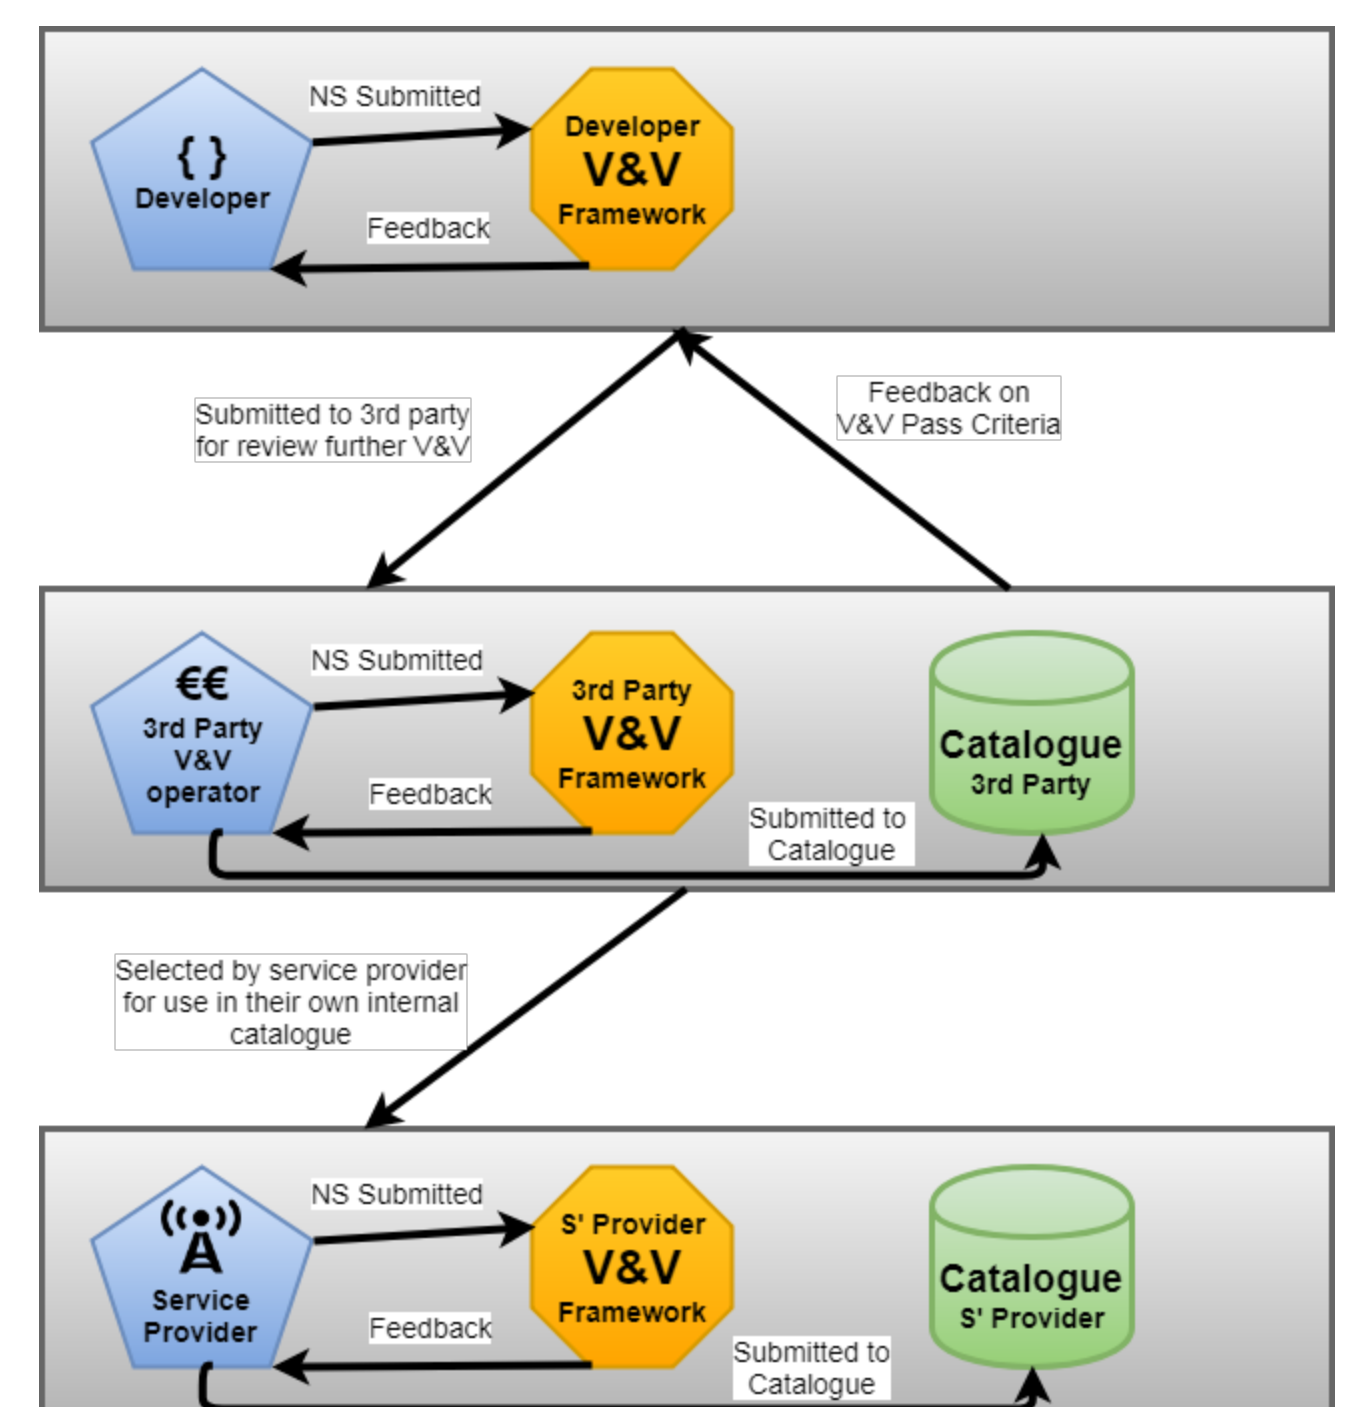

Direct Deployment to NSP

Deployment via 3PP Intermediary

Deployment using pre-validated services
